

Driveway safety star

Driveway, no play!

Parent note:

1. **Supervise** – Children should be supervised at all times. If you're the only adult at home and need to move your vehicle. Secure your child into the car before moving it.
2. **Separate** – The driveway should be treated like a road. Children should not use the driveway as a play area. Select a safe place for your child to wave goodbye to cars. Place the driveway safety spot on this safe place, so young children know not to go past this place.
3. **See** – The driver should always check behind the car, before reversing out of the driveway. Don't rely on reversing cameras.
