

## Exiting the car Checklist

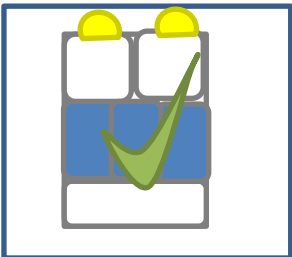

Write a checklist of things that you **should do** before getting out of the car.

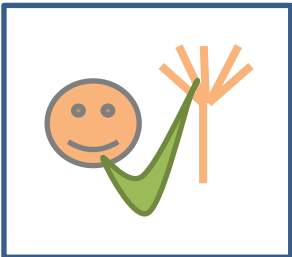

I always unclick my seatbelt before the car has stopped.

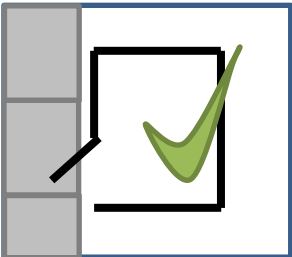

I always wait until the car has completely stopped before taking off my seatbelt.

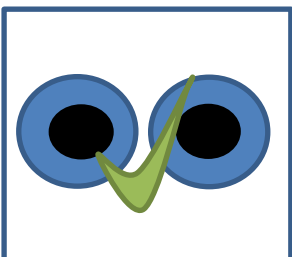

When being a passenger in the car, I always sit in the back seats.

Keep arms, legs and head inside the car when it's moving or parked on the side of the road.

I will only exit the car through the left rear door – the safety door. This is the door facing the footpath or pavement.

I use both my eyes to check that the footpath is clear before opening the car door.

Draw a picture of a person getting out of a car safely.
