

Being Road Safe

Upper Primary

Activity 3: The RAC Intellibus & your automated vehicle

In the City of South Perth, there is Australia's first driverless and electric vehicle trial operating on public roads. It is called the RAC Intellibus. There are many benefits of a driverless shuttlebus. What are some you can think of?

Where would you go in a driverless shuttle?

If buses can be automated, what else could be? Draw a vehicle you would like to see automated and label the safety features and other benefits your vehicle would include.

For the better
