

Healthier air education program

Pollution wall chart

Teachers can use this chart throughout the program to list what students already know, what they are learning about and the actions students can take.

What we already know

What actions we can take

What are we learning

For the better

Word bank

Here are some key terms used throughout our resources. Students can use this individually or you can adapt this to be a whole class reference chart.

emissions	carbon dioxide (CO ₂)
oxides of nitrogen (NO _x)	greenhouse gas
smog	pollutants

For further information
please contact CommunityEducation@rac.com.au

The mission to fight emissions

*We're on a mission to fight emissions
To rescue earth, from pollution's birth
The cars, the trucks, the power plants amass
Burns fossil fuels, makes greenhouse gas*

*We're on a mission to fight emissions
Counting the days, stuck in our ways
What can we arrange
To see where we live and play change*

*We're on a mission to fight emissions
For cleaner air, for healthy air
Less car keys, walk and bike more please
A cleaner earth, a healthy earth*
