ANNEXURE A
ASIC Benchmark Update as at 30 June 2016

	ASIC Benchmark	Prospectus No 32 (issued 14 December 2015) Content Addressing the Benchmark	Update as at 30 Jun 2016
1	Equity Ratio Issuers should maintain a minimum equity ratio [calculated as: equity capital / (total debt + equity capital)] of 20% where more than a minor part (>10%) of its activities is lending funds directly or indirectly for property development and 8% in all other cases	<p>As at 30 June 2015 RAC Finance's (RACF) equity ratio was 14.73% (13.50% as at 30 June 2014) and is defined as follows:</p> $\frac{\text{Total Equity } \$24.489\text{m}}{\text{Total Liabilities } \$141.797\text{m} + \text{Total Equity } \$24.489\text{m}} = 14.73\%$ <p>This does not satisfy Benchmark 1 which states that a minimum equity of 20.00% should be held for issuers with more than 10.00% of its lending activity directly or indirectly for property development (the benchmark is 8.00% minimum in all other cases). From an investor risk perspective, this might be an insufficient safety margin if RAC Finance were to run into financial difficulties. However, RAC Finance considers that its level of equity is appropriate for the type of business parameters described in this prospectus.</p> <p>In the financial year ending 30 June 2015, RACF paid dividends totalling \$2.145m (2014 - \$2.335m) to its parent, RACWA Holdings Pty Ltd. Future dividends may be declared subject to regulatory and liquidity considerations.</p>	<p>The equity ratio as at the date of this report is 12.82% (31 March 2016: 13.51%).</p> <p>In the financial year ending 30 June 2016, RACF paid dividends totalling \$1.895m to its parent, RACWA Holdings Pty Ltd.</p>
2	Liquidity Issuers should have cash flow estimates for the next three months, disclose their policy on balancing the maturity of their assets and the maturity of their liabilities, <i>disclose material assumptions underlying their cash flows</i> , and ensure that at all times they have on hand cash or cash equivalents sufficient to meet their projected cash needs over the next three months	<p>Benchmark 2 is satisfied. RACF ensures that at all times it holds cash or cash equivalents sufficient to meet its projected cash needs over the next three months.</p> <p>RACF projects its cash flow for the next three months at each month end as part of its ongoing compliance management processes. The material assumptions underlying these projections include analysis of recent actual investment and loan movements, likely investment rollovers (but assuming no new investment funds), investment repayments including interest payments and loan transactions including contractual loan repayments.</p> <p>RACF does not have a policy of directly matching investment and loan maturities. RACF considers that its maturity profile is reasonably matched. The majority of the investment funds are invested for a term of one year or less and the average rollover ratio over the six-month period ending 31 October 2015 was 87.14%. Whilst the majority of the loans have historically been for terms of one to five years, on average, these have been repaid within three years. RACF uses its average monthly re-investment rollover ratio to assess its future cash requirements and stress tests this ratio by 20% to allow for any adverse movement in liquidity.</p>	<p>No material change</p>
3	Rollovers / Maturities (including overdue maturities) Issuers should disclose their approach to rollovers	<p>Benchmark 3 is satisfied by RACF disclosing its policy in relation to rollovers/re-investments. RACF issues a notice of approaching maturity at least one week before the maturity date.</p> <p>At maturity, an investor can re-invest, add funds or redeem all or part of the maturity value. On the maturity date, if no other instruction has been received, RACF will automatically reinvest the maturing principal for the same term and interest payment option as the maturing investment, at the interest rate applicable at the date of maturity.</p> <p>If an investor advises after the maturity date that they do not wish to reinvest, then no interest is payable for that interim period after maturity.</p>	<p>No change</p>

Loan Portfolio cont/d	<p>RAC Finance generally restricts exposure to any single borrower to \$5m, although in certain circumstances particular borrowers may be approved for higher limits.</p> <p>Where a loan is to be used to purchase property, a motor vehicle or other significant assets, these loans will predominantly be secured by way of a registered encumbrance, mortgage or charge. All lending is currently in Western Australia, with all property lending restricted to metropolitan or large regional areas.</p> <p>RAC Finance considers a loan to be in default/arrears when a payment is 30 days overdue. This does not mean that RAC Finance takes no action prior to this point.</p> <p>Loans in arrears are managed on an individual basis. For defaulting loans covered by the National Consumer Credit Protection Act 2009 (NCCP) and the Uniform Consumer Credit Code 1996 (UCCC), there is a legal requirement to give the debtor 30 days' prior notice of enforcement. For all other loans (eg. chattel mortgages, mortgages), seven days' notice of enforcement is required. Impaired loans are suspended and provisioned where there is doubt of full recovery.</p> <p>RACF also discloses the following analysis of its loan maturity profile as at 30 June 2015:</p> <table><tr><th>Term</th><th>Amount</th></tr><tr><td>Within 3 months</td><td>\$ 21.137m</td></tr><tr><td>Between 3 months and 1 year</td><td>\$ 51.421m</td></tr><tr><td>Between 1 year and 5 years</td><td>\$ 80.941m</td></tr><tr><td>Total</td><td>\$ 153.499m</td></tr><tr><td>Weighted average effective interest rate</td><td>8.51% pa</td></tr></table>	Term	Amount	Within 3 months	\$ 21.137m	Between 3 months and 1 year	\$ 51.421m	Between 1 year and 5 years	\$ 80.941m	Total	\$ 153.499m	Weighted average effective interest rate	8.51% pa

ASIC Benchmark	Prospectus No 32 (issued 14 December 2015) Content Addressing the Benchmark	Update as at 30 June 2016
Related Party Transactions cont/d	<p>The loan facility for Watermark Enterprises Pty Ltd of \$3m represents 1.95% of total loans.</p> <p>The Directors of RAC Finance Limited currently receive directors fees for acting in that capacity of less than \$100,000 per annum in aggregate, which also applied in the previous financial year.</p>	
<p>7 Valuations Issuers lending money for property related activities should disclose their policies and approach to valuations</p>	<p>Benchmark 7 is satisfied. RAC Finance obtains valuations on all property loans on an "as is" and "on completion" basis. If a valuation is more than three months' old at the time of loan approval, RAC Finance management seek confirmation from the valuer that the value has not deteriorated, otherwise a new valuation is obtained.</p> <p>RAC Finance has an established panel of valuers in Western Australia, appointed by its senior management based on their credentials and reputation. Annually each valuer must provide evidence of current professional indemnity insurance. The choice of a valuer is dependent on their area of expertise, with consideration to pricing and turnaround time, with no valuer conducting more than one third of RAC Finance's valuation work as at the time of loan approval.</p> <p>As an exception, RAC Finance may, on occasion, choose to accept a valuation from a valuer not on its panel and generally from accredited valuers with other major lenders. RAC Finance has obtained the consent of the Trustee for its panel of valuers.</p> <p>No loan secured by a property asset exceeds 5.00% of the total value of RAC Finance's loan book.</p>	No material change
<p>8 Lending principles – Loan to Valuation Ratios Issuer should disclose their policy on how and when funds are provided to developers and where it on lends money to property related activities, it should maintain, where the loan relates to property development—70% on the basis of the latest 'as if complete' valuation; and in all other cases—80% on the basis of the latest market valuation</p>	<p>Benchmark 8 is satisfied. RAC Finance maintains a maximum 70.00% loan to valuation ratio on the basis of the latest "as if complete" valuation for property development loans. Loan funds are only provided to developers in stages, based on external evidence of the progress of the development. In all other property lending cases RAC Finance maintains a maximum 80.00% loan to valuation ratio on the basis of the latest market valuation (refer to Benchmark 7 – Valuations as to the timing of valuations). Higher loan to valuation ratios mean that the security is more vulnerable to changing market conditions such as a downturn in property markets.</p>	No material change
