## ANNEXURE A ASIC Benchmark Update as at 31 March 2024

		ASIC Benchmark Opuate as at 31 March 2024	
	ASIC Benchmark	Prospectus #40 (issued 1 Nov 23) Content Addressing the Benchmark	Update as at 31 March 2024
1	Equity Ratio Issuers should maintain a minimum equity ratio [calculated as: equity capital / (total debt + equity capital)] of 20% where more than a minor part (>10%) of its activities is lending funds directly or indirectly for property development and 8% in all other cases	As at 30 June 2023, RAC Finance's equity ratio was 15.74% (13.80% as at 30 June 2022) and is defined as follows:  Total Equity \$66.724m  Total Liabilities \$357.304m + Total Equity \$66.724m  This does not satisfy Benchmark 1 which states that a minimum equity of 20.00% should be held for issuers with more than 10.00% of its lending activity directly or indirectly for property development; the benchmark is 8.00% minimum in all other cases. From an investor risk perspective, this might be an insufficient safety margin if RAC Finance were to run into financial difficulties. However, RAC Finance considers that its level of equity is appropriate for the business model described in this prospectus.  In the financial year ended 30 June 2023, RAC Finance did not pay a dividend to its parent, RACWA Holdings Pty Ltd (but RAC Finance did pay a dividend in the amount of \$2.700m to its parent, RACWA Holdings Pty Ltd, in the financial year ending 30 June 2022). Future dividends may be declared subject to regulatory and liquidity considerations.	The equity ratio as at the date of this report is 14.17% (31 December 23: 15.68%).
2	Liquidity Issuers should have cash flow estimates for the next three months, disclose their policy on balancing the maturity of their assets and the maturity of their liabilities, disclose material assumptions underlying their cash flows, and ensure that at all times they have on hand cash or cash equivalents sufficient to meet their projected cash needs over the next three months	Benchmark 2 is satisfied. RAC Finance ensures that at all times it holds cash or cash equivalents sufficient to meet its projected cash needs over the next three months.  RAC Finance projects its cash flow for the next three months at each month end as part of its ongoing compliance management processes. The material assumptions underlying these projections include analysis of recent actual investment and loan movements, likely investment rollovers (but assuming no new investment funds), investment repayments including interest payments and loan transactions including contractual loan repayments.  RAC Finance does not have a policy of directly matching investment and loan maturities. RAC Finance considers that its maturity profile is reasonably matched. The majority of the investment funds are invested for a term of one year or less and the average rollover ratio over the six month period ended 31 August 2023 was 72.04%. Whilst the majority of loans have historically been for terms of one to five years, on average, these have been repaid within three years. RAC Finance uses its average three monthly re-investment rollover ratio to assess its future cash requirements and stress tests this ratio by 20.00% to allow for any adverse movement in liquidity.	No material changes noted.  The average reinvestment ratio for the quarter was 82.62% (31 December 23: 71.77%).
3	Rollovers / Maturities (including overdue maturities) Issuers should disclose their approach to rollovers	Benchmark 3 is satisfied by RAC Finance disclosing its policy in relation to rollovers/reinvestments.  RAC Finance issues a notice of approaching maturity at least one week before the maturity date. At maturity, an investor can reinvest, add funds or redeem all or part of the maturity value.  On the maturity date, if no other instruction has been received, RAC Finance will automatically reinvest the maturing principal for the same term and interest payment option as the maturing investment, at the interest rate applicable at the date of maturity.  If an investor advises after the maturity date that they do not wish to reinvest then no interest is payable for that interim period after maturity.	No change.

RAC Finance generally restricts exposure to any single borrower to \$7.5m, although in certain circumstances particular borrowers may be approved for higher limits.

No material change to the current nature of the loan portfolio and the overall approach to lending. Where a loan is to be used to purchase property, a motor vehicle or other significant assets, these loans will predominantly be secured by way of a registered encumbrance, mortgage or charge.

RAC Finance considers a loan to be in default/arrears when a payment is 30 days overdue. This does not mean that RAC Finance takes no action prior to this point.

Loans in arrears are managed on an individual basis. For defaulting loans covered by the National Consumer Credit Protection Act 2009 (NCCP), there is a legal requirement to give the debtor 30 days' prior notice of enforcement. For all other loans (eg. chattel mortgages, mortgages), seven days' notice of enforcement is required. Impaired loans are suspended and provisioned where there is doubt of full recovery.
