

Drink, drugs and driving

Community Education Resilient Driver's Program

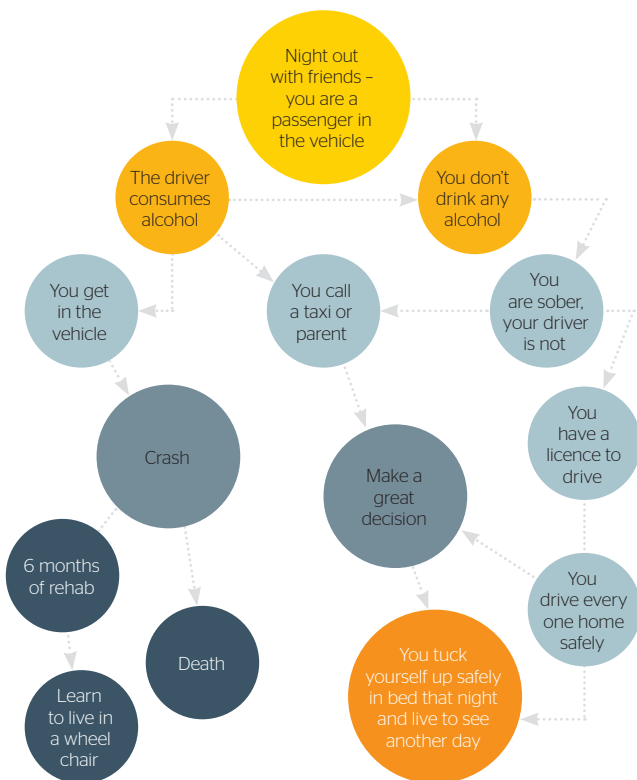

Alcohol is one of the highest contributing factors towards vehicle crashes in Western Australia, even one drink slows reaction times when driving. Have the courage to take an affected driver's keys, never allow someone to drive under the influence.

Strategies to stay safe:

- > Stay the night
- > Call somebody to come and get you
- > Keep aside cash for a taxi
- > Let somebody know where you're going

Positive decisions = positive night

Fill in the attached back up plan card and keep it in your wallet.
